

MASTER PLAN - ISAK HAMMER -

SOLVING CAHN-HILLIARD EQUATION USING CUTCIP

Version: January 22, 2023

	Phase 1	Phase 2	Phase 3	Phase 4	Report
Estimated time	2-3 Weeks	4-5 Weeks	2 Weeks	3 Weeks	
Problem	CutDG for $-\Delta u = f$	CutCIP for $\Delta^2 u = f$	$\partial_t u + \Delta^2 u = g$	$\partial_t u + \Delta^2 u + f(u) = g$	
Goals	<ul style="list-style-type: none"> Analysis <ul style="list-style-type: none"> <input type="checkbox"/> Coercivity <input type="checkbox"/> Boundedness Implementation <ul style="list-style-type: none"> <input type="checkbox"/> L^2 convergence <input type="checkbox"/> H^1 convergence 	<ul style="list-style-type: none"> Analysis <ul style="list-style-type: none"> <input type="checkbox"/> Coercivity <input type="checkbox"/> Boundedness <input type="checkbox"/> A priori estimates <input type="checkbox"/> Condition number \dagger Implementation <ul style="list-style-type: none"> <input type="checkbox"/> L^2 convergence <input type="checkbox"/> H^1 convergence 	<ul style="list-style-type: none"> Analysis <ul style="list-style-type: none"> <input type="checkbox"/> BDF analysis Implementation <ul style="list-style-type: none"> <input type="checkbox"/> $L^2 L^2$ convergence <input type="checkbox"/> $L^2 H^1$ convergence 	<ul style="list-style-type: none"> Implementation <ul style="list-style-type: none"> <input type="checkbox"/> Fixed point method <input type="checkbox"/> $L^2 L^2$ convergence <input type="checkbox"/> $L^2 H^1$ convergence 	<input type="checkbox"/> Introduction <input type="checkbox"/> CutDG $-\Delta u = f$ <ul style="list-style-type: none"> <input type="checkbox"/> Formulation <input type="checkbox"/> Closed and bounded <input type="checkbox"/> Numerical exp. <input type="checkbox"/> CutCIP for $\Delta^2 u = f$ <ul style="list-style-type: none"> <input type="checkbox"/> Formulation <input type="checkbox"/> Closed and bounded <input type="checkbox"/> A priori Estimates <input type="checkbox"/> Numerical experiments <input type="checkbox"/> CutCIP for $\partial_t u + \Delta^2 u = g$ <ul style="list-style-type: none"> <input type="checkbox"/> Time discretization <input type="checkbox"/> Numerical experiments <input type="checkbox"/> CutCIP for $\partial_t u + \Delta^2 u + f(u) = g$ <ul style="list-style-type: none"> <input type="checkbox"/> Fixed point methods <input type="checkbox"/> Numerical experiments <input type="checkbox"/> Conclusion
Comments	Mostly based on (Gürkan and Massing, 2019)	\dagger Not prioritized			
Digression		2nd order mixed formulation	2nd order mixed formulation	2nd order mixed formulation	Solve $\partial_t u + \kappa(u)\Delta^2 u = g$
