

# MASTER PLAN - ISAK HAMMER

## SOLVING CAHN-HILLIARD EQUATION USING CUTCIP

Version: March 9, 2023

	Phase 1	Phase 2	Phase 3	Phase 4	Report
Estimated time	2-3 Weeks	4-5 Weeks	2 Weeks	3 Weeks	
Problem	CutDG for $-\Delta u = f$	CutCIP for $\Delta^2 u = f$	CutCIP for $\partial_t u + \Delta^2 u = g$	CutCIP for $\partial_t u + \Delta^2 u + f(u) = g$	Progress in report
Goals	<ul style="list-style-type: none"> <li>Analysis <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Coercivity</li> <li><input checked="" type="checkbox"/> Boundedness</li> <li><input checked="" type="checkbox"/> A priori estimates</li> <li><input checked="" type="checkbox"/> Condition number</li> <li><input checked="" type="checkbox"/> Constructing face based <math>g_h</math></li> </ul> </li> <li>Implementation <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Poisson CutDG <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> <math>L^2</math> convergence</li> <li><input checked="" type="checkbox"/> <math>H^1</math> convergence</li> <li><input checked="" type="checkbox"/> <math>a_h, *</math> convergence</li> <li><input checked="" type="checkbox"/> Implement <math>\mathcal{P}^2</math> elements</li> </ul> </li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Analysis <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Initial problem setup</li> <li><input checked="" type="checkbox"/> Coercivity</li> <li><input checked="" type="checkbox"/> Boundedness</li> <li><input type="checkbox"/> A priori estimates</li> <li><input type="checkbox"/> Constructing <math>g_h</math></li> <li><input type="checkbox"/> Condition number †</li> </ul> </li> <li>Implementation <ul style="list-style-type: none"> <li><input type="checkbox"/> CIP Nitsche Implementation</li> <li><input type="checkbox"/> First plot</li> <li><input type="checkbox"/> <math>L^2</math> convergence</li> <li><input type="checkbox"/> <math>H^1</math> convergence</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Analysis <ul style="list-style-type: none"> <li><input type="checkbox"/> BDF analysis</li> </ul> </li> <li>Implementation <ul style="list-style-type: none"> <li><input type="checkbox"/> First plot</li> <li><input type="checkbox"/> <math>L^2 L^2</math> convergence</li> <li><input type="checkbox"/> <math>L^2 H^1</math> convergence</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Implementation <ul style="list-style-type: none"> <li><input type="checkbox"/> Fixed point method</li> <li><input type="checkbox"/> <math>L^2 L^2</math> convergence</li> <li><input type="checkbox"/> <math>L^2 H^1</math> convergence</li> </ul> </li> </ul>	<input type="checkbox"/> Introduction <input type="checkbox"/> Mathematical background <input type="checkbox"/> CutDG $-\Delta u = f$ <ol style="list-style-type: none"> <li><b>Strongly considering removing this section</b></li> <li><b>Very similar to CutCIP.</b></li> </ol> <input type="checkbox"/> CutCIP for $\Delta^2 u = f$ <ul style="list-style-type: none"> <li><input type="checkbox"/> Weak form in <math>H^4</math></li> <li><input type="checkbox"/> Construction of CutCIP</li> <li><input type="checkbox"/> Well-posedness</li> <li><input type="checkbox"/> A priori estimates</li> <li><input type="checkbox"/> Numerical experiments</li> </ul> <input type="checkbox"/> CutCIP for $\partial_t u + \Delta^2 u = g$ <ul style="list-style-type: none"> <li><input type="checkbox"/> Time discretization</li> <li><input type="checkbox"/> Numerical experiments</li> </ul> <input type="checkbox"/> CutCIP for $\partial_t u + \Delta^2 u + f(u) = g$ <ul style="list-style-type: none"> <li><input type="checkbox"/> Fixed point methods</li> <li><input type="checkbox"/> Numerical experiments</li> </ul> <input type="checkbox"/> Conclusion
Comments	Mostly based on (Gürkan and Massing, 2019)	† Maybe			<ul style="list-style-type: none"> <li>Marked done <b>only</b> if it is 95% done.</li> <li>Page counter: 21</li> </ul>
Digression		Aggregated FEM (Badia, Verdugo, and Martín, 2018) for $\mathcal{P}^k$ , $k = 1, 2, 3$		Solve $\partial_t u + \kappa(u)\Delta^2 u = g$	

## Other

- 1) Maybe exam in mid of April?
- 2) Easter 5.-10. April
